EDUCATION

University of Surrey BSc (Hons) Computing and Information Technology

Sept2023 - May2026

- **On track for a First-Class Honours degree**
- **Relevant Modules:** Business Analytics & Data Visualisation, Internet Scale Systems, Project Management, Artificial Intelligence.

TECHNICAL SKILLS

- **AI & Machine Learning:** Python, Scikit-learn, HuggingFace, OpenAI API, PyTorch (Concepts), Generative AI.
- **Data Engineering:** Pandas, SQL, Data Pipelines, Temporal Data Integration.
- **Engineering Practices:** Git/GitHub (Active Collaborative Workflows), Agile Delivery, Technical Documentation.

PROJECTS

Metaheuristic Hyperparameter Optimisation for LLMs

- Co-engineered a Python framework (LoRA) to fine-tune DistilBERT, accelerating ML training workflows.
- Benchmarked optimisation algorithms on A100 GPUs, cutting trainable parameters by 50% whilst maintaining 91% accuracy.

Predictive Analytics for Marine Ecology

- Engineered complex data integration scripts using Python (Pandas) to synthesise disorganised ecological datasets, aligning lagging biological indicators with real-time metrics.
- Architected a hybrid machine learning pipeline (XGBoost, K-Means) to resolve sparse longitudinal data issues, improving the reliability of experimental data tracking.

Intelligent Supervisor Allocation System (ISAS) | Final Year Project

- Implemented the Gale-Shapley stable matching algorithm and semantic NLP matching to solve complex operational resource allocation challenges in the Department of Computer Science.
- Developed a weighted recommendation model and conducted precise benchmarking to validate algorithm performance.

AI E-Learning Platform | Regional Microsoft Hackathon (Top 4)

- Engineered an AI-driven educational platform, integrating external APIs to dynamically adapt academic content for neurodiverse learners.
- Shipped a functional MVP within a strict 72-hour deadline, utilising Agile workflows and Git version control.

EXPERIENCE

Campus Brand Ambassador | BDO UK

Jan - May 2026

- Executed strategic on-campus marketing campaigns targeting STEM talent, delivering public presentations to drive graduate applications.

Head of Course Representatives | University of Surrey Student Union

Sept 2024 - June 2025

- Led departmental representation, coordinated academic feedback initiatives, and organised meetings with senior faculty to increase student satisfaction. Awarded the Golden Award for Course Representative of the year.

Vice President | Surrey Computer Science Society

Sept 2024 - June 2025

- Organised technical workshops, hackathons, and networking events to foster a collaborative engineering community for over 1,500 student developers and digital followers.

ADDITIONAL INFORMATION

- Languages: Fluent in English, Arabic, and French.
