PROJECT

AI-powered e-learning platform for neurodiverse students (Microsoft hackathon)

October 2024

- Collaborated with students from diverse disciplines to design an AI tool that adapts academic content for neurodiverse learners.
- Used creativity and problem-solving to design the UI in Figma, manage code with Git/GitHub, and coordinate tasks using Agile and MoSCoW frameworks.
- Demonstrated strong teamwork, flexibility, and communication skills resulting in a 4th place finish among 20+ teams.

University Moderating System Web App

March 2024

- Developed an AI-powered web app for neurodiverse students using Python, Django, and React, with Git for version control.
- Led a diverse team, ensuring accessibility through active listening and collaborative problem-solving.
- Placed 4th out of 100+ teams at a Microsoft hackathon, demonstrating innovation under pressure.

DataVizor – AI-Powered Web App for Privacy Policy Analysis

April 2025

- Led a team for 3 weeks, managing stand-ups, Jira tasks, and sponsor updates with strong communication and problem-solving skills.
- Delivered an AI web app using Next.js, Prisma, Docker, and Supabase, applying Agile methods and demonstrating quick learning.
- Proofread documentation in Google Docs, Notion, showcasing attention to detail and commitment to clarity.

EXPERIENCE

Internship Experience UK (Bright Network)

July 2025

- Gained professional business experience through workshops, building a strong understanding of operations and cross-functional support in finance and tech.
- Strengthened resilience by completing a real-world project under tight deadlines and peer review.
- Improved communication and teamwork through live sessions and collaborative tasks.

Head of course representatives, University of Surrey Student Union

September 2024 - Present

- Led 30 course reps to resolve academic issues for 1,200+ students through teamwork and problem-solving.
- Organised meetings with students and academics (in person and via Teams) to escalate and address concerns.
- Coordinated with university leadership, improving communication and boosting department satisfaction to 77%.

VOLUNTEERING

Vice President of the Surrey Computer Science Society

September 2024 - Present

- Led a committee of 10, organising events and collaborations to boost student engagement.
- Ran weekly meetings, delegated tasks, and used Microsoft tools for planning and tracking.
- Communicated with the Students' Union and sponsors to secure support and ensure smooth delivery.
