EDUCATION

University of Southampton MSc in Artificial Intelligence

Sept2026 - Sept2027

- **Grade:** On track / Targeting 70%+ (Distinction).

University of Surrey BSc (Hons) Computing and Information Technology

Sept2023 - May2026

- **Grade:** First-Class Honours degree.

TECHNICAL SKILLS

- **AI & Data Science:** Python, Large Language Models (LLMs), Transformer-based Architectures, Scikit-learn, Gradient Boosted Models (XGBoost), Sentence-BERT.
- **Data Engineering & Analytics:** SQL, Pandas, Predictive Modelling, Data Discovery, Temporal Data Integration.
- **Engineering Practices:** Git/GitHub (Active Collaborative Workflows), Agile Delivery, Task Automation, AI Tool Fluency.

PROJECTS

Intelligent Supervisor Allocation System (ISAS) | Final Year Project

- Automated department matching for 250+ students using the Gale-Shapley algorithm and NLP semantic analysis.
- Achieved a 100% stable placement rate, eliminating bottlenecks and cutting administrative workload by 80%.

Predictive Analytics for Marine Ecology

- Engineered complex data integration scripts using Python (Pandas) to synthesise disorganised ecological datasets, aligning lagging biological indicators with real-time metrics.
- Architected a hybrid machine learning pipeline (XGBoost, K-Means) to resolve sparse longitudinal data issues, improving the reliability of experimental data tracking.

Metaheuristic Hyperparameter Optimisation for LLMs

- Co-engineered a Python framework (LoRA) to fine-tune DistilBERT, accelerating ML training workflows.
- Benchmarked optimisation algorithms on A100 GPUs, cutting trainable parameters by 50% whilst maintaining 91% accuracy.

AI E-Learning Platform | Regional Microsoft Hackathon (Top 4)

- Engineered an AI-driven educational platform, integrating external APIs to dynamically adapt academic content for neurodiverse learners.
- Shipped a functional MVP within a strict 72-hour deadline, utilising Agile workflows and Git version control.

EXPERIENCE

Campus Brand Ambassador | BDO UK

Jan - May 2026

- Executed strategic on-campus marketing campaigns targeting STEM talent, delivering public presentations to drive graduate applications.

Computing Laboratory Assistant | University of Surrey

Jan 2026 – May 2026

- Facilitated weekly computing lab sessions for 50+ undergraduate students, providing real-time code debugging and troubleshooting in Python and Java to resolve technical blockers and increase practical assignment completion rates.

Head of Course Representatives | University of Surrey Student Union

Sept 2024 - June 2025

- Led departmental representation, coordinated academic feedback initiatives, and organised meetings with senior faculty to increase student satisfaction. Awarded the Golden Award for Course Representative of the year.

LANGUAGES

- Fluent in French, English and Arabic and Tamazight.
